

PowerCET Offers Operational Skills QuickStart CD for the AEMC PowerPad® 3945-B Three-Phase Power Quality Analyzer

New CD is the latest in PowerCET's 30+ volume CD/DVD courseware library

SANTA CLARA, Calif.—August 20, 2007—[PowerCET](#) Corporation, world-recognized experts in power quality consulting, education and training, announces the availability of the new QuickStart Operational Training CD for the AEMC PowerPad® 3945-B Power Quality Analyzer. In a series of four 12-15 minute modules, users of the AEMC PowerPad 3945-B are provided with concise instruction on the setup and operation of the instrument and the companion PC-based DataView software. Aptly named “QuickStart,” this CD is designed to give users of the PowerPad 3945-B what they need to quickly put this powerful instrument to work. The CD also contains a PDF workbook covering all the materials presented in the modules and a series of exercises at the end of each module.

According to Bruce Lonie, president of PowerCET Corporation, “Over the past 20 years, literally thousands of electrical professionals have benefited from our in-depth operational skills and educational classes. This QuickStart CD and the others in our courseware library offer quality instruction and useful insights that every user can utilize to get the most from their instrumentation investment.”

PowerCET Corporation, based in Santa Clara, California with field offices in Ottawa, Canada and in Scottsdale, Arizona, offers a full range of classroom instruction courses covering operational skills training for many of the most popular brands of power, energy and power quality instrumentation. PowerCET also offers educational courses covering a range of power and power quality-related topics including grounding, harmonics, lightning and others. Many of these topics are also available as part of PowerCET's CD/DVD courseware library.

Course Number: [A-AE-3945-CD](#)
Price: \$349.00
